Athira Soman

Senior Angular Developer

Kochi, Kerala | +91-7510220514 | athiravsoman12@gmail.com | https://www.linkedin.com/in/athira-soman

PROFESSIONAL SUMMARY

Senior Front-End Developer with 7+ years of experience in designing, developing, and maintaining enterprise web applications using Angular (Versions 2–18), TypeScript, JavaScript, RxJS, NgRx, HTML5, CSS3, SCSS, Angular Material, and REST APIs. Proven expertise in building scalable, responsive, and high-performance web applications while following Agile methodologies and industry best practices. Completed professional training in Node.js and React.js and eager to contribute to full-stack and modern front-end development opportunities. A collaborative team player committed to delivering innovative, high-quality software solutions that support organizational goals and continuous improvement.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript (ES6+)

Frontend Framework: Angular (Versions 2–18)

Frontend Technologies: HTML5, CSS3, SCSS

UI Libraries & Components: Angular Material, Bootstrap, AG Grid

State Management: RxJS, NgRx

API Integration & Communication: REST APIs, WebSocket (Socket Programming), GraphQL (Basic Knowledge)

Backend Technologies: Node.js (Training)

Architecture: Monorepo, Micro Frontend Architecture, Module Federation

Frontend Library: React.js (Training)

Testing: Jasmine, Karma, Unit Testing, End-to-End (E2E) Testing

Development Tools: Git, Azure DevOps, JIRA, Postman, Visual Studio Code, npm

Methodologies: Agile (Scrum), SDLC

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)

IT Analyst | May 2023 – Present

Projects: PIT/OBI for bank , Data Analytics tool

Responsibilities:

- Develop and enhance enterprise-scale web applications based on Jira user stories, functional requirements, and technical specifications.
- Design and implement Micro Frontend (MFE) architectures, including Micro Frontend application development and integration with existing applications.
- Develop reusable and scalable UI components using Angular Material, CDK, TypeScript, and RxJS, following component-driven and modular development practices.
- Design and develop complex reusable data-grid solutions, including multi-level/nested data grids, expandable rows, dynamic columns, and drag-and-drop functionality using Angular Material/CDK.
- Build reusable UI components and shared modules that can be leveraged across multiple applications and projects.
- Develop applications using REST APIs and HTTP Client, including API integration, data transformation, error handling, and asynchronous data management.
- Work with GraphQL for application development and API integration, using Apollo Client for querying, mutations, caching, and managing GraphQL data.
- Implement end-to-end (E2E), integration, and functional testing to ensure application reliability and cross-module integration.
- Develop and maintain applications for large-scale enterprise projects, focusing on scalability, performance, maintainability, and reusability.
- Collaborate with cross-functional teams including business analysts, backend developers, QA engineers, and architects to deliver features aligned with project requirements.
- Analyze technical requirements, participate in solution discussions, and contribute to UI architecture and technical design decisions.
- Troubleshoot and resolve complex UI, integration, performance, and data-rendering issues across enterprise applications.
- Follow Agile/Scrum practices, including Jira-based task management, sprint planning, daily stand-ups, code reviews, and release activities.

Quest Global

Senior Software Engineer | Nov/2021 - Apr/2023

Projects: VT Inspection , EFEP

Responsibilities:

- Implemented application state management using NgRx Store, including actions, reducers, selectors, and effects where applicable.
- Integrated AG Grid to build feature-rich and high-performance data tables with sorting, filtering, pagination, and dynamic data handling.
- Integrated and customized client-specific UI components based on business and functional requirements.
- Led the Angular application upgrade from Angular 7 to Angular 14, addressing compatibility issues and updating dependencies and application code.
- Analyzed and resolved functional and UI defects.

UST Global

Developer II Software Engineering/Associative Software developer | Oct 2018 – Nov 2021

Projects: Deep Resolve WikiWiki, Anthem EBA Course

Responsibilities:

- Developed responsive web applications based on UX designs, ensuring pixel-level consistency across browsers and platforms.
- Integrated REST APIs and implemented form-based authentication and authorization.
- Progressed from Associate Software Developer to Developer II Software Engineering through internal promotion.

Internship | Apr 2018 – Sep 2018

- Contributed to an internal Angular-based portal for leave, work, seat, and asset allocation.
- Converted to a full-time employee following the successful completion of the internship.

ACHIEVEMENTS & RECOGNITION

- On-the-Spot Award, TCS: Received three times for timely delivery and performance.
- Hackathon Winner , TCS
- On-the-Fly Award , Quest Global
- USTAR Recognition, UST

WORKSHOPS & TRAINING

React.js Workshop – Quest Global & Node.js Training– TCS

EDUCATION

Master of Computer Applications (MCA)
Kerala Technological University, Thiruvananthapuram, Kerala, India

PERSONAL DETAILS

- Date of Birth – 12 July 1996
- Gender – Female
- Nationality – Indian

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
